Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3,14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frantzen (6083259) in view of Milo (6206911). Frantzen discloses (Figs. 1-3) a reconfigurable elongate body **10** capable of being inserted in the coronary sinus that is delivered in a first configuration and to a second lengthwise contracted configuration. It can be seen there are a plurality of spring members **60** forming intermediate spring segments between proximal and distal ends **12,14**. The sections containing the spring members **60** contract while the sections having the axial bars **51** do not contract. It can also be seen that the spring members have a generally U-shaped configuration extending substantially widthwise of elongated body longitudinal axis. Regarding claims 2,3, Frantzen discloses the stent is made of an elastic material, such as shape memory alloy, col. 6, lines 11-19. However, Frantzen fails to disclose the stent includes a plurality of barbs extending distally from the proximal end and proximally extending from the distal end and also extending from the spring segments. Milo teaches that barbs are disposed about the stent body and extend proximally **51** and distally **53**. Milo also teaches they are oriented or extend axially and attach a biological membrane with therapeutic material, col. 6 lines 2,4,6-10,38-52. It would have been obvious to one of

ordinary skill in the art to use a plurality of barbs at the proximal, distal and spring segment sections in order to secure a biomembrane with drugs for treating the vessel.

Response to Arguments

Applicant's arguments with respect to claims 1,14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
